## DIGITAL 3D SYSTEM

---

### FOR THEATERS LOOKING TO CONVERT TO 3D OR ADD MULTIPLE 3D SCREENS

The MI-WAVE3D offers an economic option for digital 3D presentation. Using an automated liquid crystal polarization modulator, the MI-WAVE3D is an easy way to bring studio-approved 3D cinema to your customers.

---

#### / ECONOMICAL

The MI-WAVE3D is based on LC technology, making it a smart choice for cinemas looking to add 3D screens to their theater or to convert screens to 3D.

#### / FULLY AUTOMATED

The MI-WAVE3D is fully automated for 2D/3D positioning with the included sliding actuator.

#### / LIGHTWEIGHT PASSIVE EYEWEAR

The MI-WAVE3D uses extremely comfortable and cost-effective passive 3D glasses, enabling you to reduce operating costs and avoid battery replacement issues. These glasses are available in a variety of designs and themes.

#### / EASY TO SET UP

The MI-WAVE3D is easy to install, with pedestal and wall-mount adapters included. The control console with LED display can be rack-mounted for convenience.

#### / STUDIO CERTIFIED

The MI-WAVE3D is studio-approved and HFR-ready, allowing you to present the latest Hollywood 3D content at your theater.

#### / TRUST

MasterImage 3D delivers the ultimate 3D experience to theaters and audiences around the world, with a customer retention rate of over 99%. Over 6,000 MasterImage 3D systems have been installed worldwide.
