

NEW

SX-2001A Digital Cinema Server

The stunning solution for both 2K and 4K digital cinema

Touch Panel Control (optional)

SX-2001A Digital Cinema Server

GDC Technology is proud to introduce the new **SX-2001A Digital Cinema Server with built-in Media Block**, our fifth generation digital cinema playback server designed to fully comply with DCI specifications. The SX-2001A ships with a FIPS 140-2 Level 3 Certified Media Block providing the highest level of security recommended by DCI.

The SX-2001A can support both 2K and 4K resolutions that is future-proof based on Texas Instrument's Enhanced DLP Cinema[®] technology, retaining all of the attractive SA-2100A's features such as:

- 2K/4K DCI MXF JPEG2000 playback
- DCI approved forensic watermarking
- Ingest of Digital Cinema Packages (DCPs) via physical media, network and satellite
- DCI MXF JPEG2000 3D playback
- HDTV/Live3D live streaming capabilities
- MPEG2 MXF Interop playback
- Highly stable Linux-based operating system

In addition, the SX-2001A offers increased storage capacity and flexibility with the following unique features.

Unique Features

Supports Barco, Christie and NEC Series 2 Projectors

The SX-2001A seamlessly integrates with all Series 2 projectors including Barco, Christie and NEC to ensure highly reliable and secure content delivery.

Integrated 3D Live support

The SX-2001A comes integrated with SENSIO[®] Hi-Fi 3D* and RealD LIVE*, which makes receiving high-quality 3D broadcasts possible. The SX-2001A also features a built-in integrated 3D receiver-decoder (optional) to seamlessly support 3D Live broadcast without requiring additional receiver-decoder.

Supports All Approved 3D Systems

The SX-2001A seamlessly integrates with numerous studio-approved 3D systems such as RealD, MasterImage, Dolby 3D and active 3D systems.

Finest 3D Playback

The SX-2001A provides the highest quality 3D playback with 12-bit 4:4:4 output images (left and right), providing 500 times more color spectrum than legacy servers.

USB 3.0 Interface (Optional)

The SX-2001A features an optional USB 3.0 interface that increases content ingest speed by approximately 2 times faster than a USB 2.0 interface.

Supports Closed Captioning Devices

The SX-2001A supports various closed captioning devices such as USL Closed Captioning Device and WGBH Rear Window Captioning Device to enhance the hearing or visual impaired cinema patron's movie-going experience.

Up to 4TB of Redundant Hot Swappable Storage (Optional)

The SX-2001A comes with 3 hot swappable data drives that can easily be attached or detached. The SX-2001A is able to remain operational in the event of a single drive failure, thereby minimizing downtime.

Instant Playback from CRU Drive Sleds *

The SX-2001A allows for instant playback from the CRU drive sleds without requiring content ingest, which reduces time to screening in emergency situations.

Instant Playback from TMS Media Library

The SX-2001A allows for instant playback from the Theatre Management System's (TMS) content library to the server, providing greater flexibility for show management.

Remote Access of the Screen Management System

Cinema operators can remotely access GDC servers using Theatre Management System (TMS) and Screen Management System (SMS) from a Windows[®] PC, or mobile devices such as the Apple[®] iPhone[™].

Optional Feature

Quad Link Option (SX-2001AQ)

The SX-2001A can also be upgraded to the SX-2001AQ which features four HD-SDI outputs. This option enables the SX-2001AQ to be used for highest quality 3D playback with dual stream 12-bit 4:4:4 output images to two projectors simultaneously.

SX-2001A Digital Cinema Server Technical Specifications

Physical

Dimensions 482 (W) x 616 (D) x 177 (H) mm 4RU
Weight 25kg (55lbs)

Environmental

Operating temperature 5° to 40°C (41° to 104°F)
Operating humidity 20% to 90%, non-condensing
Operating altitude 10,000ft. above sea level

Power

Power requirement 100 to 240V, 60 to 50Hz, 6 to 3A
Max power consumption 320W
Redundant power supplies Redundant internal hot swappable x 2
Uninterrupted power supply (UPS) 3-way, meets IEEE STD 587 Cat. A
with surge protection (optional) 6KV test

Video Specifications

JPEG 2000 2048 x 1080 - 24 (2D), 48 (3D)
1920 x 1080 - 29.97 (2D), 30 (2D)
MPEG 2/MPEG 4 SD/HD
Packaging SMPTE Digital Cinema Package (DCP),
Interop DCP, DSR®

Video Output

Single link HD-SDI SMPTE 292M 10-bit 4:2:2
Dual link HD-SDI SMPTE 372M 12-bit 4:4:4,
Dual SMPTE 292M 10-bit 4:2:2
(for 3D playback)
Quad link HD-SDI (optional) Dual SMPTE 372M 12-bit 4:4:4,
(for 3D or dual 2D playback)

Audio Output

Digital uncompressed audio 16/24-bit AES/EBU,
16 channels, 48/96 KHz
D-sub 26-pin
Audio Offset +/- 500 frames

System Interfaces

Ethernet 2 x RJ-45
(1x10/100 BaseT, 1 x 1000 BaseT)
USB 2.0 6 x USB A-Type Female
USB 3.0 (optional) 2 x USB A-Type Female
8-port GPIO/D-sub 37-pin
DVD-ROM drive * Read speed 8x
HDD sled * CRU-Dataport
DVB-ASI (optional) BNC, CENELEC EN 50083-9 standard
270Mbps
RS232 D-sub 9-pin
Modem Interface with remote access software

Storage

Redundant hot swappable 2000GB (Upgradable to 4000GB)

Security

AES 128-bit encrypted data storage
CineLink II™ link encryption
Civolution (Thomson NexGuard®) forensic watermarking
FIPS 140-2 Level 3

Subtitles

Subtitle overlay on server
Projector Cinecanvas support

Reference Input

Analog Genlock

User Interface

External Panel Control (optional) Integrated Control of digital cinema servers and DLP Cinema® Projectors
Windows® PC network control Remote access to the screen management system (SMS) and server user interface

SX-2001 Series Digital Cinema Server

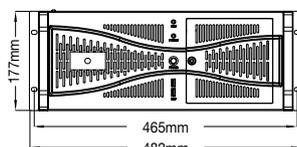

The SX-2001 Digital Cinema Server is available in various configurations to suit the differing needs of cinema owners. Cinemas that already utilize a theatre management system (TMS) will find the SX-2001T and SX-2001TQ a cost efficient choice. Meanwhile, cinemas not using TMS can benefit from the increased ingest options available in both the SX-2001A and SX-2001AQ.

- * Users must secure license directly from Sensio and RealD before activation of SENSIO® Hi-Fi 3D and RealD LIVE.
- * Only available in SX-2001A and SX-2001AQ
- * Supports Dolby Digital (AC-3) in pass-through mode only, which requires external AC-3 decoder or sound processor for integration.
